Kitten Feeding Chart

General feeding guidelines:

- Kittens are individuals, and feedings should be tailored to each specific situation.
- “Daily” means feedings evenly spaced over a 24-hour period.
- Avoid “homemade” formulas (only use in an emergency, over a very short term until a quality kitten milk replacer can be obtained).
- Do **not** use cow’s milk or confuse ‘Cat Milk’ with kitten milk replacement formula. ‘Cat Milk’ is meant as a treat for older cats and does not contain the nutrients necessary to support kittens.

Age in weeks	Weight	mL per day	Daily feedings
1	4 oz.	32 mL	6 - 8
2	7 oz.	56 mL	4 - 6
3	10 oz.	80 mL	3 - 4
4	13 oz.	104 mL	3
5	1 pound	128 mL	3
6+	Solids, may still nurse	Variable	3

FYI: 15 mL = approximately 3 teaspoons or ½ ounce
